Product Manager | Fintech & Payments | Mumbai, India

Product Manager with 2+ years of end-to-end product lifecycle experience, focused on reconciliation, financial controls, and fraud analytics. Founded a music-tech venture that reached $125K in annual revenue, then moved into finance operations: cut a 4-hour reconciliation to 4 minutes and uncovered ₹8.57L in fraud. Targeting PM / APM roles in fintech and payments.

Education

MASTER OF BUSINESS ADMINISTRATION– COEP Technological University – Pune, MH Aug 2024

Majors: Design Thinking & Innovation, Financial Securities & Derivatives, Investment Banking, Corporate Valuations, Advanced Analytics, Agile & Scrum

Minors: User Experience (UX) Design & Usability, Go-to-Market Strategy, Stakeholder Management, OKRs & KPI Frameworks

BACHELOR OF TECHNOLOGY– Vellore Institute of Technology – Vellore, TN June 2021

Courses: Software Development Lifecycle (SDLC), Computational Thinking

Work Experience

DATA ANALYST (ASSOCIATE) – THE SLEEP COMPANY - Mumbai, MH July 2026-Present

- Automated a fully manual, VLOOKUP-based reconciliation process spanning SAP, OMS (BigQuery), POS, marketplace/Central Store data, and Unicommerce - cutting turnaround from 4 hours to 4 minutes (98% faster) while reconciling 70,199 line items at 99.99% accuracy.
- Surfaced systemic data-integrity gaps during reconciliation - a duplicate OMS join-key and 396 unmatched channel orders - enabling targeted fixes over recurring manual patchwork.
- Independently led a forensic audit of manually-created replacement/return orders across 100K+ records and 5 systems; uncovered ₹8.57L in fraud, isolated its single largest source, and authored a report that informed policy enforcement.
- Diagnosed and eliminated recurring accuracy errors in a 7-year-old Balance Sheet & P&L model - including cross-month data bleed from brittle cell-based pointers and Cost Center/Profit Center misclassification - replacing it with an automated pipeline driven by Trial Balance postings.

PRODUCT MANAGER (FOUNDER-LED VENTURE) – Young Ceo Entertainment - Pune, MH Dec 2023-June 2026

- Identified a $5M opportunity in Indian music-tech & secured direct Government of India validation, winning a ₹3,60,000 grant for project inception.
- Owned end-to-end product roadmap and MVP delivery, prioritizing the backlog via MoSCoW and directing design (Figma) and execution (Jira) across a 6-member team - achieving 87% task completion and a +42 NPS.
- Ran Agile ceremonies (sprint planning, daily standups, retrospectives), cutting time-to-market by 30% and shipping to TRL-5 with 10+ paying customers and $125K in annual revenue.
- Defined and executed GTM strategy across two launches, growing adoption to 200+ users and building investor confidence; concluded operations June 2026 after validating product-market fit, redirecting toward structured product organizations.

Projects

FORENSIC AUDIT: MANUAL ORDER FRAUD DETECTION: SQL, EXCEL, DATA FORENSICS

- Consolidated 100K+ order records across 5 disconnected systems (internal orders, Central Store tracker, fulfillment exports, support tickets) and designed a multi-layered red-flag framework - SKU-mismatch, address-change, and support-ticket validation, plus a novel "ticket-leverage" test for tickets justifying multiple orders.
- Identified 84 tickets misused to generate 194 unauthorized replacement orders totaling ₹8,56,737 in exposure, isolating a concentrated source responsible for most flagged value and volume, and authored a leadership-facing report translating the findings into a clear modus-operandi narrative that informed policy enforcement.

RECONCILIATION PROCESS AUTOMATION: EXCEL, VBA, BATCH SCRIPTING, SQL (BIGQUERY)

- Replaced a manual, multi-source reconciliation workflow (SAP, OMS/BigQuery, POS, Unicommerce, marketplace portals) with a folder-driven batch pipeline extended across Settlements, Sales, and other monthly cycles, cutting turnaround from 4 hours to 4 minutes while reconciling 70,199 line items at 99.99% accuracy.
- Diagnosed a systemic sync failure causing 220 of 103,192 orders to not flow into Unicommerce, tracing the root cause to a null "UC Created" date field in the OMS system.

Skills & Certifications

Product: Product Roadmapping, Backlog Prioritization (MoSCoW), PRD Writing, User Story Mapping, Agile/Scrum, Sprint Planning, OKRs & KPI Frameworks, Product Strategy, Go-to-Market (GTM) Strategy, Stakeholder Management
Data & Financial Systems: SQL, Google BigQuery, Python, Power BI, Excel VBA/Macros,
Tools: Jira, Confluence, Figma (Wireframing, Prototyping), Mixpanel, Google Analytics, A/B Testing, Cohort Analysis
